

The image shows a web browser window with the title "SWISH -- demoprolog.pl". The browser has several tabs open, with the first tab labeled "demoprolog" and containing the text "eats(sue,X)". The main content area displays a Prolog error message. The message starts with a warning icon and says "Clauses of eats/2 are not together in the source-file". It then provides more details: "Earlier definition at ⚙ line 3" and "Current predicate: alive/1". A suggestion is given: "Use :- disjoint eats/2. to suppress this message". At the bottom of the message box, it says "X = peanuts".

demoprolog Program Program Program

Clauses of eats/2 are not together in the source-file  
Earlier definition at line 3  
Current predicate: alive/1  
Use :- disjoint eats/2. to suppress this message

**X** = peanuts
